Welcome to International Alcohol Information Database (IAID) – Research

We invite you to browse the records in IAID-Research, which covers research on beverage alcohol from biomedical, social, behavioral, prevention, treatment, policy, and regulatory research fields. Begin your search using the General Search bar at the top of the page, or select the Advanced Search option in the upper right of the page.

The database currently contains approximately 50,000 citations going back to 2003 and includes only citations from peer-reviewed research journals. Full citations and abstracts where available are included. The full text of articles is not available, although links to journal websites are provided wherever possible.

WHAT'S NEW

SEARCH TIPS

Multiple search terms entered in the general search box will be treated as an "any word" search. Please use inverted commas or quotation marks (") when searching for a phrase.

For the **Author** field: Please enter a single author surname or a surname and up to two initials (e.g. Smith PH).

The International Center for Alcohol Policies (ICAP) is a not-for-profit organization supported by major international producers of beverage alcohol. Established in 1995, ICAP is a think tank with a mission of promoting understanding of the role of alcohol in society and helping to reduce harmful drinking worldwide. ICAP has been

ADVANCED SEARCH

ALCOHOL STUDIES DATABASE

This web page enables you to search for citations to alcohol studies sources. Over 80,000 citations are available. Type text in the boxes below. You can select the type of search from the picklist at the right of the box. [Click here](#) to select subject terms from the thesaurus.

Keywords

Keywords

10 Results per page

Begin at record:

Search Help:

- * **Keyword** - A keyword search will find items anywhere in the bibliographic record.
- * **Thesaurus** - A thesaurus search will find common subject terms from the Alcohol Studies Thesaurus to add to your keyword and then search the subject field.
- * **Other Fields** - A field search will find items that appear in the element corresponding to the selected field, e.g., "Title", "Subject", "Description", etc.
- * **Boolean search** - A search for "marijuana" or "ecstasy" will find records containing "marijuana", or records containing "ecstasy", whereas a search for "marijuana" and "ecstasy" will find items containing both "marijuana" and "ecstasy." Mixed Boolean searches such as "Jane and Doe or John" or "Jane or Doe and John" are not supported.
- * **Truncation** - Supports right-truncated queries. The query term "williams*" finds all records containing the word "Williams" or "Williamson", or any other word that starts with the prefix "williams."
- * **Phrase searching** - Use double quotes to search for a specific phrase. For example: "family history of alcoholism" as opposed to "family", "history", and "alcoholism" as keywords. Truncation does not work inside of phrases.
- * **Date searching** - Enter a four digit year.

www.drinksresearch.org

The screenshot shows a web browser window with the address bar displaying "www.drinksresearch.org". The page features a dark blue header with navigation links: "RESEARCH", "CONTACT", "REGISTER", and "LOG IN". Below the header, the ICAP logo is displayed alongside the text "International Center for Alcohol Policies" and the tagline "Analysis. Balance. Partnership." The main heading is "International Alcohol Information Database - Research", with "HOME" and "ADVANCED SEARCH" links to its right. A search bar is labeled "General Search:" and includes a "GO" button. The main content area contains a welcome message, a description of the database's scope (biomedical, social, behavioral, prevention, treatment, policy, and regulatory research), and a note that the database contains approximately 50,000 citations from peer-reviewed journals. A "WHAT'S NEW" section on the right provides "SEARCH TIPS", explaining that multiple search terms are treated as an "any word" search and that inverted commas are used for phrase searches. It also specifies that the "Author" field should contain a single author surname or a surname and up to two initials (e.g., Smith PH). At the bottom, a paragraph describes ICAP as a not-for-profit organization supported by major international producers of beverage alcohol, established in 1995, with a mission to promote understanding of alcohol's role in society and reduce harmful drinking worldwide.
